

## EPDM & NEOPRENE FOAM RUBBER

### MATERIAL SAFETY DATA SHEET

#### 1. Chemical Composition

A compounded blend of cross-linked synthetic rubbers with inert fillers and processing additives.

#### 2. Hazard Identification

In normal conditions the materials present negligible risk to health. The materials are unlikely to cause any irritation through skin contact and no noxious fumes are released at ambient temperatures.

#### 3. First Aid Measures

Eye contact	Wash with clean water and seek medical attention if any discomfort persists.
Skin Contact	Wash well with soap and water, seek medical attention if irritation persists.
Ingestion	Should not occur, if it does seek medical attention.

#### 4. Firefighting measures

Acceptable extinguishing media are water, water/foam and dry powder. Hydrogen chloride, carbon monoxide, ammonia and other toxic gases are liberated when PVC is burned. Breathing apparatus is recommended to be worn.

#### 5. Spill or leak procedure

Vacuum, sweep or shovel up any excess. Any waste should be disposed in accordance with local regulations.

#### 6. Handling & Storage

Material should be stored in cool, dry conditions away from direct sunlight. When handling use normal standards of industrial hygiene.

The company's products are used for a multiplicity of purposes and as the company has no control over the method of their applications or use, the company excludes all conditions or warranties, expressed or implied by statute or otherwise, as to their products and/or their fitness for any particular purpose. Any technical co-operation between the company and the customer is given for customers assistance only and without liability on the part of the company

**7. Personal protection**

Respiratory	Use approved dust masks if required.
Eye protection	Safety glasses as required.
Skin protection	Barrier creams or gloves when required.

**8. Physical properties**

Sheets or rolls of cellular rubber supplied in various densities and colours. The materials normally have a slight odour and are insoluble in water.

**9. Stability & Reactivity**

These materials are stable under normal storage and temperatures.

**10. Toxicological Information**

The materials are classified as non-hazardous.

**11. Ecological Information**

No harmful effects are known from handling these materials.

**12. Disposal**

Dispose of materials should be in accordance with local and national legislation.

**13. Transport Information**

The materials are not classified as dangerous for transport.

**14. Regulatory Information**

The materials are not classified as dangerous for supply or use

**15. Other information**

The user is responsible for determining if the grade of material is suitable for the application.

The company's products are used for a multiplicity of purposes and as the company has no control over the method of their applications or use, the company excludes all conditions or warranties, expressed or implied by statute or otherwise, as to their products and/or their fitness for any particular purpose.
